

MISSCHO International Summer School 2025. Migration in times of disinformation.

Description of the activity

International migration has been a central topic of public, political, and academic debate for years. Misinformation, fake news, and incitements to xenophobia and racism are not new phenomena; however, with the expansion of social media and digital information channels, their reach, dissemination, and forms of transmission have intensified. In this context, we ask ourselves: What role do universities and scientific research centers play in building fairer and more accurate information about international migration? How can our research contribute in a scenario where misinformation is increasingly widespread? How can we bring knowledge closer to society? These are some of the questions that shape the works to be presented at this summer school, approached from various disciplines.

Date

From 7th to 11st July, 2025

Venue

Institute for Migration Research, University of Granada (Spain)

Organizers

- Alberto Capote Lama -Department of Human Geography
- María Dolores García Valverde -Deputy Director of the Migration Institute
